Hints

In case you get an EADDRINUSE error

To get the PID of the Process that uses a specific port (here: port 5000):

```
$ lsof -i :5000
$ ls -e | grep <PID>
```

Sending an HTTP POST request using CURL

Request

```
$ curl -X POST -H "Content-Type: application/json" \
  -d '{"user4": {"name": "Jango", "password": "luke", "job": "headhunter", "id": 4}}' \
  http://localhost:4080/
```

Response

```
 1  {
 2      "user1": {
 3          "name": "dingo",
 4          "password": "1234",
 5          "job": "dealer",
 6          "id": 1
 7      },
 8      "user2": {
 9          "name": "bingo",
10          "password": "0987",
11          "job": "farmer",
12          "id": 2
13      },
14      "user3": {
15          "name": "ringo",
16          "password": "asdf",
17          "job": "boss",
18          "id": 3
19      },
20      "user4": {
21          "name": "Jango",
22          "password": "luke",
23          "job": "headhunter",
24          "id": 4
25      }
26  }
```
