

LectureDoc2 Cheat Sheet

Information

Author: Michael Eichberg

Version: Work in Progress

Admonitions

Standard reStructuredText admonitions: `attention`, `caution`, `danger`, `error`, `hint`, `important`, `note`, `tip` and `warning`

LectureDoc2 specific admonitions: `background`, `definition`, `proof`, `theorem`, `lemma`, `conclusion`, `observation`, `remark`, `summary`, `legend`, `repetition`, `question`, `answer`, `remember`, `deprecated`, `assessment`, and `example`.

ExamplesCode

SVGs

SVGs can easily be embedded directly in RST documents. Direct embedding has the advantage that animation is then possible.

Sizing of SVGsBasic ExampleMarkers and StylesFont-size dependent SVGs

Code Blocks

Use the standard `.. code::` directive to create a code block.

Numbering LinesCopy to Clipboard

Vertical Titles TODO

Add the class `vertical-title` to rotate the title and to change the layout of the slide to a column-based layout. To get back to a row based layout add a container with the class `width-100`.

Examples

Slide Tweaks

Slide without Title

To hide the title of a slide assign the class `no-title`.

Vertically Centered Content

Use the class `center-content`.

Examples

Sections and Subsections

Create a slide that marks the beginning of a new section or subsection by adding the class `new-section` or `new-subsection` to the slide.

Exercises and Solutions

Associate the class `exercises` with a slide to indicate that the slide contains an exercise.

Use the directive `.. exercise::` to add an exercise. To add a solution use the custom directive `.. solution::` inside of an exercise block and specify the password (optional) using the attribute `:pwd:`.

Example (Solution in supplemental information)

```
.. exercise:: <Title>
```

<Description of the exercise.>

```
.. solution:: <Title>
```

```
:pwd: 1234
```

<Solution>

You can configure a master-password using meta information:

```
.. meta::
```

```
:master-password: <Master-password>
```

Table of Contents

A navigable table of contents can be created using standard `rst` techniques.

Example

Table of Contents

- `Section 1 Title`_

- `Subsection 1.1 Title`_

Footnotes

[#] _ and .. [#] create footnotes.

Test\ [#]_

```
.. [#] `test.org`
```

Explicit Footers

A container with the class `footer-left`, `footer-right` or `block-footer`.

References

Use standard `rst` references.

Example

```
...
```

Like described in [Eic24]_ ...

```
...
```

References

```
.. [Eic24] LectureDoc2; 2024
```

Fade-out Content

Add the class `fade-out` to a container to whiten the content.

Supplemental Information

Use the directive `supplemental` for respective information.

Example

```
.. supplemental::
```

<Text>

Text Alignment

Control text alignment: `text-align-[left|center|right]`

Images

Adding a drop-shadow and rounded corners: picture.

Tables

The layout can be adapted using: `compact`, `compact-cells`, `no-table-borders`, `no-inner-borders`, `no-column-borders`, `fake-header [-2nd] -row` and `fake-header [-2nd] -column`.

Animation

`incremental` (and `wobble`).

`highlight-line-on-hover` (always usable), `highlight-on-hover` (explicit column or row headers are not supported) or `highlight-identical-cells`

Lists

■ `list-with-explanations` renders text paragraphs of list items less pronounced.

(As shown here.)

■ Use `impressive` to make the list more impressive:

■ Add `negative-list` to use " ! " for bullet points.

■ Add `positive-list` to use "✓" for bullet points.

Example

- Point 1

```
.. class:: negative-list list-with-explanations
```

- Point 2

Some on-slide explanation.

```
.. class:: positive-list
```

- Point 3

Decorations

`line-above` draws a horizontal lines.

`box-shadow` adds a shadow.

`rounded-corners` the corners will be rounded.

Example

```
.. container:: margin-top-1em
               line-above
               padding-top-1em
               box-shadow
```

Text

Font Styling

"rem" based relative sizes: `xxl`, `huge`, `large`, `small`, `footnotesize`, `scriptsize`, `tiny`, `x-tiny`, `xx-tiny`

"em" based relative sizes: `larger`, `smaller`, `far-smaller`

Font weight: `bold`, `light`, `thin`

Font family: `monospaced`, `serif`

Font style: `italic`

Slide Transitions

Available slide transitions: `transition-move-left`, `transition-scale`, `transition-fade`, `transition-move-to-top`

Example

```
.. class:: transition-move-left
```

<Slide Title>

Revealing Slide Content

All elements with the class `incremental` are revealed incrementally.

Example

```
.. class:: incremental
```

- Item 1 - Part 1

:incremental: Item 1 - Part 2

- Item 2

Column-based Layouts

Use `two-columns` and `three-columns` for respective layouts.

Example

```
.. container:: two-columns
```

```
.. container:: column no-separator
```

<Column 1>

```
.. container:: column
```

<Column 2>

Add `no-default-width` to the root container for content based column widths. Use class `no-separator` on the left column to remove the separator.

Stacked Layouts

Stacked layouts are based on nested layers. Each layer - except of the first one - needs to have the class `incremental` and/or the class `overlay` for transparent layers. (Up to 10 layers are supported.) To turn off the numbering of opaque layers use `.no-number`.

Images in Stacked Layouts

To avoid that a parent element of a floating element is collapsed add the class `clearfix` to the parent element; i. e., when a layer just contains a floating image.

Example

```
.. deck::
```

```
.. card:: clearfix
```

```
.. image:: <p1.svg>
:align: left
```

```
.. card:: overlay
```

```
.. image:: <p2.svg>
```

```
.. card:: warning
```

<Content>

Semantic-based Text Markup

`peripheral`: for less important text. `obsolete`: for obsolete statements. `ger`: to markup German Words. `eng`: to markup English words.

Box sizes

Use `width-100%` and `width-75%` to control the width of a container.

Colors (roles)

Font Colors

`red`, `gray`, `light-gray`, `blue`, `green`, `black`, `white`, `shiny-green`, `shiny-red`

Background Colors

`red-background`, `dhbw-gray-background`, `dhbw-light-gray-background`, `white-background`, `blue-background`, `light-green-background`, `green-background`, `yellow-background`

Example

```
:dhbw-red: Red Text.
```

Fine-grained Control (Try to avoid!)

`margin-none`, `margin-0-5em`, `margin-1em`, `margin-top-1em`, `margin-top-2em`, `margin-bottom-1em`, `margin-bottom-2em`, `margin-right-1em`, `margin-left-1em`, `padding-none`, `padding-0-5em`, `padding-1em`, `padding-top-1em`, `padding-top-2em`

Hiding slides (⚠ rst2ld only)

Use `hide-slide` to exempt it from slide generation.

Example

```
.. class:: hide-slide
```

```
<Hidden Slide >
-----
```

Configuration

LectureDoc meta information:

`id` The unique identifier for the slide set. Required to store the current state of the presentation.

`slide-dimensions` the slides dimension (default: "1920x1200").

`first-slide` Determines the first slide that is shown (e.g., `<Slide Number>` or "last-viewed").

Example

```
.. meta::
  :id: <unique id>
  :slide-dimensions: 2560x1440
  :first-slide: last-viewed
```

Cheat Sheets with LD²

A cheat-sheet is a slide with the class `cheat-sheet-8-columns`.

Template

```
.. class:: cheat-sheet-8-columns

<Title>
-----

.. container:: cheat-sheet-block

  .. rubric:: <TOPIC>

  .. rubric:: <SUB-TOPIC>
```

Useful Role and Substitution Definitions

Template

```
.. role:: incremental
.. role:: eng
.. role:: ger
.. role:: peripheral
.. role:: obsolete
.. role:: red
.. role:: gray
.. role:: light-gray
.. role:: blue
.. role:: green
.. role:: orange
.. role:: shiny-green
.. role:: shiny-red
.. role:: dark-red
.. role:: black

.. role:: raw-html(raw)
:format: html
```
